Finally a service that can help the traffic situation because it is full time and you do not have to wait for the information. It might help traffic flow patterns. Also, try satellite radio, no air wave pollution. No commercials just the freedom of choice. I pay for the service and because of that issue I should be able to receive the service. If I choose to pay for this service. Once you listen to sat radio you will not go back to a local station.

Why don't the lobbyist use their energy and money to clean up the public air waves. Have you listened to some of the broadcaster on the public air waves. You need to focus on a real problem and not a pay for service. Do not let politics interfere with the freedom of choice and information. Use your time to work on the public air waves and get the broadcaster's to clean up their act. Do not support the petition.
